Just what the skin doctor ordered!™

immaculate CORRECTION™

revitalizing skin tone equalizer

50 ml - 1.7 oz

\$62

Skin Concern: Hyperpigmentation due to scarring, melasma or photodamage.

DERMAdoctor Solution: Immaculate Correction is a hydroquinone free skin lightener that eliminates unwanted skin pigmentation by targeting several points in the formation and activation of the enzyme tyrosinase.

Feature	Benefit
Mitracarpus Scaber Extract (Harounoside) and Arctostaphylos Uva Ursi Extract (Arbutin)	Molecularly similar to hydroquinone yet more effective without its undesirable effects.
Dithiooctanediol	Prevents the formation of essential enzyme Tyrosinase responsible for creating melanin
Azelaic Acid	Works on overactive melanocytes (pigment forming cells) to lighten skin
Gluconic Acid	Chelating agent prevents enzyme Tyrosinase activation
Suitilains	Dissolves the intercellular glue binding epidermal cells, helping speed exfoliation and cellular turn over
Glucosamine and Urea	Firms and softens skin

Inform Your Client

- Lightens skin discoloration and rejuvenates skin.
- Hydroquinone free to eliminate irritation.
- Can be incorporated into all skincare regimens.
- Anticipate results in 6 to 12 months of continued use.
- Daily use of a full spectrum SPF 30 will optimize and maintain results.

Directions

Apply twice daily to clean, dry skin. Follow with moisturizer and full spectrum SPF 30.
