Just what the skin doctor ordered!®

## MED e TATE®

injection-free medicated hyperhidrosis control wipes for a blissfully dry existence

30 packettes of 3 ml - 0.1 oz

\$48 USD

**Skin Concern:** Hyperhidrosis – excessive sweating despite being inactive. Medical hyperhidrosis affects 3% of Americans. The face, underarms, palms, soles, areas under the breasts, cleavage and groin areas are most commonly affected.

You don't have to have hyperhidrosis to need MEDeTATE. Sweaty hands due to anxiety from dates, job interviews, and the curves that life throws you are embarrassing. MEDeTATE helps prevent this. Also keeps make-up from melting on a hot day; prevents fashion emergency wet spots under breasts, underarms and inner thighs.

**DERMAdoctor Solution:** MEDeTATE your way to a blissfully dry existence with a technique so simple, it merely requires a single stroke of a towelette. Alleviates the need for cumbersome anti-sweating devices; ineffective topical prescriptions, drowsiness-inducing Rx meds and costly and painful Botox Cosmetic® injections or invasive surgery.

Purify the being and eliminate embarrassing excessive sweating and wetness. This harmonious union of dermatologist recommended antiperspirant therapy and innovative **"needle-free" technology**, replaces a perspiration-filled reality with a supremely dry state of consciousness.

MEDeTATE contains a patent pending formulation of newest generation antiperspirant therapy with a blend of agents that **mimic the effects of Botox Cosmetic® when applied topically.**  
**Patent Pending**

The core of this topical alternative to costly injection-based hyperhidrosis control: a patent-pending blend of peptides and botanicals to accentuate the experience:

Feature	Benefit
Aluminum Zirconium Tetrachlorohydrate 19%	FDA approved newest generation high-potency antiperspirant
GABA	Helps improve the ability to resist the temptation to sweat
Dipeptide Diaminobutyryl Benzylamide Diacetate	Small peptide mimics the activity of Temple Viper venom
Portulaca	Potassium rich ion source derived from a West African botanical
Gynostemma	Replete with saponins, this botanical agent delivers additional benefits
Ginseng	Asian root that helps the body to cope with stress

### Inform The Consumer

- The highest potency antiperspirant available and contains botanicals to help maximize dryness.
- Useful also for maintaining life of make-up on hot, humid days.
- May also help temporarily improve the appearance of fine facial lines.
- Individual packettes easily fit into purse or pocket for discrete use whenever needed.

### Directions

Apply to clean, dry skin. For external use only. Do not use on broken or freshly shaved skin. Stop use if rash or irritation occurs.

Dermatologist Tested & Approved, Allergy Tested, Non Irritating, Non Comedogenic, Fragrance Free, Dye Free, Botulinum Toxin Free, No Animal Testing
